ABSTRACTED-PUB-NO: KR2002023065A

BASIC-ABSTRACT:

NOVELTY - A display part of a washing machine is provided to protect the display part including an LCD(Liquid Crystal Display) from an external force and the humidity by enclosing the display part with a protection casing, thereby improving the reliability of the washing machine.

DETAILED DESCRIPTION - A display part of a washing machine includes an LCD(22a) connected to a flexible PCB for displaying image data, a reflector casing(30) mounted with the LCD at an upper part and formed with a plurality of coupling protrusions at a bottom surface, and an LED board(42) having coupling holes corresponding to the coupling protrusions(33), wherein the LED board is fixed by forming fusing parts(44) by melting lower end parts of the coupling protrusions while the coupling protrusions are received in the coupling holes.
